

Workday Extend

Intecrowd is one of a few selected partners to include Workday Extend in their range of services. Workday Extend allows customers to extend the capability of their Workday solution by creating applications and extensions to meet unique business requirements - while taking advantage of the Power of One.

What Is Possible

Are there processes or data that you don't capture in Workday today?

Unique business requirements, applications, and activities can sometimes require special processes and data that fall outside the core capabilities of Workday. Workday Extend (W.E.) offers Workday clients a great way to meet those specific requirements and extend the value of Workday to your business.

Are there business-specific applications that you would like to retire?

Many of our clients have a variety of unique or industry-specific applications in parallel with Workday. The functionality that these one-off applications may never be appropriate for Workday. But you still need the capability... With Workday Extend you can retire these unicorns and bring that functionality into Workday and extend the value of your solution.

Would you like to do more with data that does not reside in Workday?

Access to data and analysis of that data helps to run your business better - the Power of One. Bringing external data into Workday and providing the ability to display and analyse that data is just one of the ways that Workday Extend can be applied to enhance the analysis that drives your business.

We can help

As a Workday Extend Partner, we have worked with W.E. from its outset and can bring that experience in the Platform to your specific needs. We work with our clients and Workday to ensure there won't be a duplication of effort and expense. From there, we review your business requirements, technology landscape, data requirements and Workday configuration to determine the most effective way to leverage W.E. This approach ensures that our customers take advantage of W.E. and Workday to maximize the Power of One to run your business.
