

Workday Translator

Eliminate manual translations and costly third-party services with Intecrowd's AI Translation Generator—now available on the Workday Marketplace.

Our Solution

Managing multilingual Workday data is now seamless with Intecrowd's Workday Translator (AI Translation Generator). Save time and costs by automatically translating Workday tenant data in minutes - the solution supports 75 languages and enables faster, more efficient localization across global teams. This eliminates the need for external translation providers, manual copy-pasting, or complex EIB loads, and other time consuming and costly processes.

Automatically and quickly translates:

- Job Descriptions
- Learning Course Titles
- Help Text
- Compensation Structures
- Business Process Workflows
- Custom Fields
- Worker Records
- Reports
- Dashboards
- And More

Benefits:

- ✓ Save Time – Automate translations and eliminate need for manual data entry or third-party services.
- ✓ Reduce Costs – Avoid expensive translation providers and cut administrative overhead.
- ✓ Ensure Accuracy – AI-powered contextual translations eliminate errors from manual processing.

Solution includes:

- AI-Generated Translations – Automatically translate Workday tenant data, eliminating manual effort.
- Automated Loading of Translations – No need to manage EIB loads; translations are applied directly within Workday.
- Workforce Enablement & Inclusivity– Ensure employees worldwide have access to key data in their preferred language.
- End-to-End Translations in Minutes – Eliminate delays with fast, seamless AI-powered translations.
- Faster – Reduces translation time by over 90%. AI learns and gets faster with successive translations.
